

# Energy Data Mapper

## Your Customised Energy Data Solution Online

Offer **your** clients and partners the latest global energy statistics on an interactive interface embedded in **your** web site customised with **your** logo, graphical chart and content!

With Energy Data Mapper, grant your clients a 24/7 access to reliable and up-to-date datasets of global energy key data, through a nice and intuitive online interface. The application package includes:

- ➔ Premium content from Enerdata, a globally recognised information source in the energy industry
- ➔ A selection of the most relevant data covering up to 50 countries (annual series up to 2009)
- ➔ Customisation with your logo & corporate graphical chart
- ➔ Hosting on Enerdata's fully secured servers
- ➔ Maintenance & support from Enerdata's IT specialists
- ➔ Assistance from Enerdata's teams of analysts & economists

YOUR Logo

**Choice of series**

- ☑ Total energy
- ☑ Crude oil
- ☑ Oil products
- ☑ Natural gas
- ☑ Coal, lignite
- ☑ Power
- ☑ Renewables
- ☑ CO2-fuel combustion

Total energy consumption

Source Enerdata

**Global ranking**

Total energy consumption	
Year : 2009	Unit : Mtoe
China	2,234
United States	2,201
India	655
Russia	621
Japan	459
Germany	315
France	254
Canada	244
Brazil	238
South Korea	233

**Insightful graphs**

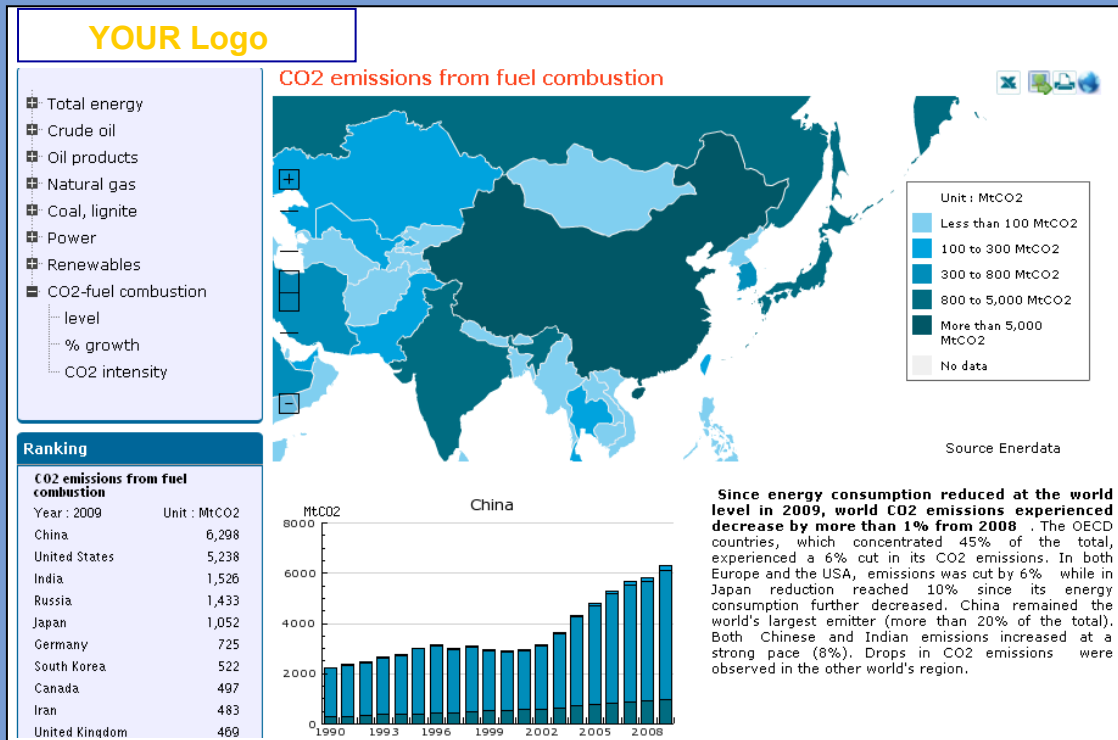

Primary consumption is the balance of primary production, external trade, marine bunkers and stock changes. Total primary consumption for all products evaluates the total energy consumption of a country. The primary consumption includes biomass. For the world, marine bunkers are included. This induces a gap with the sum of regions.

Total energy includes coal, gas, oil, electricity, heat and biomass.

**Excel data export**

**Interactive map**

Bring value to your clients & prospects with an efficient & complimentary marketing tool totally customised to your corporate communication!  
Offering valuable content online is a decisive way to build client/partner loyalty and acquire new customers.
