

# Table of contents :

## Executive Summary

## Definitions

## Part 1: Electrolysers manufacturing capacity

### 1. Global production

1. Yearly manufacturing capacity in GW
2. Cumulated manufacturing capacity in GW
3. Global hydrogen production capacity in tonnes/year
4. Manufacturing capacity by company
5. Yearly manufacturing capacity in GW by technology
6. Cumulated manufacturing capacity in GW by technology
7. Comparison with IEA Net Zero Scenario

### 2. Regional production

1. Yearly manufacturing capacity by region
2. Cumulated manufacturing capacity by region
3. Identification of electrolyser manufacturing plants by region

### 3. Cost analysis based on manufacturers data

1. Hydrogen and electrolysers cost targets from companies
2. Hydrogen and electrolysers cost targets from IRENA (2021)
3. Electrolysers factories cost targets

## Part 2: Major electrolysers manufacturers

### 4. First-tier :

1. Nel
2. Thyssenkrupp Nucera
3. Plug Power
4. John Cockerill
5. LONGi
6. Siemens Energy
7. Cummins Accelerera

### 5. Second-tier :

1. McPHY
2. ITM Power
3. HydrogenPro
4. Ohmium
5. Topsoe

### 6. Third-tier :

Around 130 companies manufacturing electrolyser systems

## Part 3: Are global ambitions for electrolyser installations realistic ?

### 7. Electrolysis production vs. National/Regional ambitions

1. European Union
2. China
3. Other Asian countries
4. North America
