

Electrolysers manufacturing capacity report

Edition 2024

Maël GOURET & Fabrice POULIN

October 2024

Table of contents :

Executive Summary

Definitions

Part 1: Electrolysers manufacturing capacity

1.1 Global production

1. Yearly manufacturing capacity in GW
2. Cumulated manufacturing capacity in GW
3. Global hydrogen production capacity in tonnes/year
4. Manufacturing capacity by company
5. Yearly manufacturing capacity in GW by technology
6. Cumulated manufacturing capacity in GW by technology
7. Comparison with IEA Net Zero Scenario

1.2 Regional production

1. Yearly manufacturing capacity by region
2. Cumulated manufacturing capacity by region
3. Identification of electrolyser manufacturing plants by region

1.3 Cost analysis based on manufacturers data

1. Hydrogen and electrolysers cost targets from companies
2. Hydrogen and electrolysers cost targets from IRENA (2021)
3. Electrolysers factories cost targets

Part 2: Major electrolysers manufacturers

2.1 First-tier :

1. LONGi
2. Thyssenkrupp Nucera
3. John Cockerill
4. Peric
5. Sungrow Hydrogen
6. Plug Power

2.2 Second-tier :

1. Siemens Energy
2. Cummins Accelera
3. Nel
4. HydrogenPro
5. Ohmium
6. McPhy

2.3 Third-tier :

Over 150 companies manufacturing electrolyser systems

Part 3: Are global ambitions for electrolyser installations realistic ?

Electrolysis production vs. National/Regional ambitions

1. European Union
2. China
3. Other Asian countries
4. North America
